NIKHIL RAI

n2005rai@gmail.com | +91-7428345094 | linkedin.com/in/nikhil-rai-dev | github.com/Nikhil2005Rai | nikhilrai.me | New Delhi, India

PROFESSIONAL SUMMARY

CSE undergrad (9.12 CGPA) and competitive programmer (2000+ Rating on LeetCode) with expertise in full-stack development (TypeScript, Next.js, Node.js, PostgreSQL). Skilled in REST APIs, event-driven architecture, and cloud deployment (Docker). Seeking an SWE internship to build scalable backend systems and modern web products.

EDUCATION

Noida Institute of Engineering and Technology, Greater Noida
Bachelor of Technology, Computer Science and Engineering | CGPA: 9.12 | 2023–2027

TECHNICAL SKILLS

Languages: C, C++, Java, Python, TypeScript, JavaScript
AI & GenAI: LangGraph, LangChain, RAG, Graph RAG, Multi-Agent Systems, Knowledge Graphs, Vector Search (pgvector), LLMs, LangSmith, Prompt Engineering
Frontend: React.js, Next.js, Tailwind CSS, Redux, Zustand, HTML5/CSS3
Backend: Node.js, Express.js, FastAPI, PostgreSQL, MongoDB, Prisma ORM, Redis, REST APIs
DevOps & Cloud: Docker, AWS, Cloudflare Workers, Git, GitHub, Linux, Postman
Core CS: Data Structures & Algorithms, Operating Systems, DBMS, Object-Oriented Programming (OOP), System Design, Microservices Architecture

PROJECTS

Archimedes – **Event-Driven Workflow Automation Platform** [**Live URL**] github.com/Nikhil2005Rai/Archimedes
• **Tech:** FastAPI, Next.js, Python, TypeScript, LangGraph, PostgreSQL (pgvector), Upstash Redis, Docker
• Developed an autonomous multi-agent environment utilizing LangGraph for dynamic query routing through Planner, Knowledge, Coding and Web Research agents.
• Integrated Graph RAG with pgvector for multi-hop reasoning and optimized performance using Upstash Redis caching.
• Minimized inference latency and operational expenses through Upstash Redis caching and engineered a robust Fernet encryption key rotation mechanism.

Nodebase – **Event-Driven Workflow Automation Platform** [**Live URL**] github.com/Nikhil2005Rai/Nodebase
• **Tech:** Next.js, Typescript, Prisma ORM, PostgreSQL, Sentry, Docker
•Built an event-driven workflow automation platform supporting AI, API, database, and custom workflow nodes.
•Designed a modular workflow engine for executing multi-step automation pipelines.
•Optimized PostgreSQL performance and integrated Sentry for production monitoring.

WorkNet - **Real-Time Team Communication Platform** [**Live URL**] github.com/Nikhil2005Rai/WorkNet
• **Tech:** Next.js, TypeScript, Convex, PostgreSQL, REST APIs, RBAC
• Built a real-time team communication platform with RBAC and multi-workspace support.
• Implemented real-time messaging and optimized REST APIs for faster database performance.
• Designed normalized PostgreSQL schemas for scalable collaboration.

ACHIEVEMENTS

• **LeetCode** [**Profile**]: **2000**+ rating with 1000+ algorithmic problems solved across different platforms — **top 5%** globally
• **CodeChef** [**Profile**]: **3-star** rated competitive programmer
• **IICPC CodeFest 2026** Global Prelims: Rank **2362** among 13,000+ participants (**Top ~18%**)
• **2nd** Prize – NIET WebWeave Hackathon

CERTIFICATIONS

• TechA Certified Java Developer
• Java Fundamentals – Oracle Academy
• Introduction to Cybersecurity – Cisco
